TERM I-MAY - 2017
SAMPLE PAPER
ENGLISH

Class: IV Sec:
 Date:
 Name:

Max.Marks:20
 Time:1 hr
 Roll No:.....

General Instructions

1. All the questions are compulsory
2. Answer all questions in a separate paper

SECTION – A
READING COMPREHENSION

Read the following paragraph below and answer the following questions:-
 There are many different types of landforms. Landforms are natural features on the planet’s surface. You probably know about some of them already!

Mountains are very tall landforms. They can be pointed or rounded, and some are even volcanic! When there are many mountains together, it is called a mountain range. Some mountains are formed from lava, while other mountains are formed when the plates under the earth’s surface crash together and push up the land. Either way mountains are formed, it takes many, many years.

Valleys are the spaces between mountains. Some valleys are V-shaped, and some are U-shaped. Many people live in valleys, because they have a comfortable temperature, are protected, and may have rivers flowing through them.
