TERM I-MAY - 2017
PERIODIC TEST 1
ENGLISH

Class: IV Sec:
 Date: 23.05.17
 Name:

Max.Marks:20
 Time:1 hr
 Roll No:.....

General Instructions

1. All the questions are compulsory
2. Answer all questions in a separate paper

Q.I

SECTION – A
READING COMPREHENSION

Read the following paragraph below and answer the following questions:-

The ocean is never still. Whether observing from the beach or a boat, we expect to see waves on the horizon. Waves are created by energy passing through water, causing it to move in a circular motion. However, water does not actually travel in waves. Waves transmit energy, not water, across the ocean and if not obstructed by anything, they have the potential to travel across an entire ocean basin.

Waves are most commonly caused by wind. Wind- driven waves, or surface waves, are created by the friction between wind and surface water. As wind blows across the surface of the ocean or a lake, the continual disturbance creates a wave crest. These types of waves are found globally across the open ocean and along the coast.
