

INDIAN SCHOOL DARSAIT

DEPARTMENT OF SCIENCE

Subject : Science

Topic :
**The Living Organisms and
their Surroundings**

Date of Worksheet : 25-10-2017

Resource Person: Mrs. Haseena Begum

Date of submission:

Name of the Student : _____

Class & Division : _____

Roll Number : _____

Q.1	Name the following: 1. Two terrestrial habitats. 2. Two aquatic habitats. 3. Two grassland animals. 4. Two important abiotic factors needed for growth of plants 5. Breathing organs of fish and earthworms.	5
Q.2	Fill in the blanks: 1. Fish have _____ shaped body that help them to move inside water. 2. Small changes that take place in the body of a living organism over a short period to overcome to some problems due to changes in the surrounding are called _____. 3. In the mountain regions, the trees are normally _____ shaped. 4. The process of producing more of their own kind by the living organisms is called _____. 5. Frogs have _____ feet that help them to swim in water. 6. Dolphins and whales breathe through _____. 7. The process of getting rid of wastes by the living organisms is called _____. 8. The stems of aquatic plants are long, _____ and _____. 9. During respiration, organisms take in _____ and give out _____. 10. Exchange of gases in plants take place through the tiny pores on the leaves called _____.	10

Q.3	Write true or false: 1. Several kinds of plants and animals share the same habitat: 2. The light brown skin of the lion helps it to become a predator in the grassland: 3. Desert animals like snakes and rats come during the day: 4.The plant living in water are called xerophytes. 5. Animals living in mountain regions have thick skin or fur: 6. Plants do not show respond to stimuli: 7. Some plants remove some of their waste products as secretions : 8. Camels excrete large amount of urine and their dung is wet: 9. Plants carry out photosynthesis only during the daytime and respiration at night.	9
Q.4	Name two plants and two animals of mountain regions.	2
Q.5	Give an example of a non-living thing, which shows any two characteristics of living things.	2
Q.6	Give examples of animals which give birth to young ones.	2
Q.7	Give examples of Terrestrial habitats.	2
Q.8	Give examples of aquatic habitats.	2
Q.9	What are the two components of habitat?	2
Q.10	How will you define stimulus? Give one example.	2
Q.11	Differentiate between biotic and abiotic components.	2
Q.12 a) b)	Complete the given analogy. Fish : Aquatic :: _____ : Desert Rattlesnake: Desert :: Deer : _____	2
