

INDIAN SCHOOL DARSAIT DEPARTMENT OF CHEMISTRY

Subj	ect: Chemistry Topic : Polymers		Date of Worksheet: 14.8.2018	
Reso	ource Person: SREEKALA M		Date of Submission:	
Nam	ne of the Student: Class &Divis	sion: XII	Roll Number:	
1.	What is the repeating structural unit in polythene po	olymer?		1
2.	What are addition polymers? How are the two type other? Give one example of each type.	s of additior	polymers different from each	2
3.	Differentiate the following pair of polymers based i) Novolac and Bakelite (structure) ii) Buna-S and Terylene (intermolecular fo			2
4.	Distinguish between the terms 'homopolymer' and type.	'copolymer	' and give one example of each	2
5.	Write: a) Reaction involved in the preparation of biod b) Monomer unit of synthetic rubber (Neopren c) One use of Nylon-6,6		olyester	3
6.	Define the terms Elastomers and Fibres and give or	ne example o	of each.	2
7.	Write the monomers used and one use for each of to i) Terylene ii) Neoprene iii) Nylon-2-Ny			3
8.	Identify the four groups into which the polymers are classified on the basis of the magnitude of intermolecular forces present in them. To which group or groups do polythene and Bakelite belong?			3
9.	Differentiate between the modes of formation of ad Give one example of each of these formations.	ldition polyr	ner and a condensation polymer.	3
10.	Write names of monomer/s of the following polym condensation polymers. a)Teflon b) Bakelite c) Natural rubber	ers and class	sify them as addition or	3

11.	a) Identify aliphatic biodegradable polyester which is used in packaging and orthopedic devices.			
	i) Write its full form.			
	ii) Give the structures of monomers from which it is formed.			
	iii) Show the formation of polymer.			
	b) Write the name and structure of the monomer of nylon-6			
12.				
	i) Bakelite ii) Nylon6,6 iii) PVC			
13.				
	b) Which polymer is obtained when free radical polymerization of chloroprene occurs? Write the structure of the polymer thus obtained.			
14.	a) What is the role of Benzoyl peroxide in polymerization of ethene?	3		
	b) What are LDPE and HDPE? How are they prepared? Write the structural difference between LDPE and HDPE?			
15.	Distinguish between Chain growth (Addition) polymerization and step growth (Condensation) polymerization and give one example of each process.			
16.	Write the names of monomers of the following polymers:	3		
	$ \begin{array}{cccccccccccccccccccccccccccccccccccc$			
17.	Arrange the following polymers in increasing order of their intermolecular forces. (i) Nylon 6,6, Buna-S, Polythene. (ii) Nylon 6, Neoprene, Polyvinyl chloride.
